Issue 1 — AMOS USERS CLUB

Welcome!

Pactronics would like to offer you the opportunity to join the only OFFICIAL AMOS Users Club for Australia and New Zealand. You are now the proud owner of a staggeringly powerful language which will enable you to create some very professional looking software. Stephen Hill and the staff at Mandarin Software have worked very hard to produce the 300-page manual, but it cannot hope to cover every aspect of AMOS. The aim of the club is to guide you through the complexities of AMOS and keep you right up to date with the latest developments from Mandarin and other third party developers. You'll have access to the very latest AMOS public domain programs - and I encourage you to send in your efforts for everyone to see. In addition, you will be able to ring us for help and advice on any questions you may have on (02)748-4884.

You will also be notified of any AMOS products when they become available and we will be holding special AMOS competitions from time to time. Also, as a member of the AMOS Users Club, you will receive up-dates on all our Amiga products and be covered by the exclusive Pactronics lifetime warranty on all of your Pactronics software. If you are already a member of our Up-Date Club, please note this when returning the enclosed Membership form.
We will also be looking at programs you may write with a view to distributing them both here and overseas if they are good enough.

May we wish you many hours of enjoyment using AMOS.

NEIL MILLER

EDITOR - AMOS USERS CLUB

P.S. You can only become a member of the Club by returning the Membership form that comes in this package.

ABOUT BUGS

With more than 500 commands, it's virtually impossible for AMOS to be bug free, despite the fact that so many developers have been working with AMOS for the last few months. However, due to the publishers setting very high standards, STOS is for all intents and purposes bug free, and we can expect a similar attention to detail and speedy fixing for AMOS. The AMOS Club will keep you up to date with any problems encountered, and you will be able to get updates very quickly direct from Pactronics or from the Users Club.

If you do encounter bugs or problems, please inform Pactronics. It's best if you can send the offending program which causes the problem - this will help them to locate the bug quickly and easily.

PUBLIC DOMAIN LIBRARY

We intend to fill this library with useful utilities, graphics, sound samples, resources, in fact, anything and everything to do with AMOS. We also need your support by sharing your creations with other AMOS users. Everyone will benefit and it will help to spread the word about AMOS. The first list of P.D. disk will be sent to you in July. Each P.D. disk will cost $5.00 plus $2.00 postage and packaging.

All requests for P.D. disks or submissions must be sent to:

F.A.O. NEIL MILLER

AMOS USERS CLUB

P.O. BOX 253

RYDALMERE NSW 2116

with an enclosed cheque or money order for $7.00 (DO NOT SEND CASH!). Similarly, any program you would care to share for P.D. distribution, please forward to the same address shown above.
